Brewer New York, State of New York (State) David F. Burg

Priscilla J. Brewer examines the development and history of the first American appliance, the cast iron stove, that created a quiet but culturally contested transformation of domestic life and sparked many important debates about the role of women in industrialization, the definition of social class, and the development of a consumer economy. Brewer explores the shift from fireplaces to stoves for cooking and heating in American homes and sheds new light on the supposedly separate spheres of home and world of nineteenth century America. She also considers the changing responses to technological development, the emergence of a consumption ethic, and the attempt to define and preserve distinct Anglo American middle class culture.
