drawing on surviving documents from the fourteenth and fifteenth centuries the nature of the early ottoman state provides a revisionist approach to the study of the formative years of the ottoman empire challenging the predominant view that a desire to spread islam accounted for ottoman success during the fourteenth century advance into southeastern europe lowry argues that the primary motivation was a desire for booty and slaves the early ottomans were a plundering confederacy open to anyone muslim or christian who could meaningfully contribute to this goal it was this lack of a strict religious orthodoxy and a willingness to preserve local customs and practices that allowed the ottomans to gain and maintain support later accounts were written to buttress what had become the self image of the dynasty following its incorporation of the heartland of the islamic world in the sixteenth century

corresponded with the pope on the ottoman state offering assistance to the andalusian state that was destroyed in 1492 ottoman harem ottoman legal codes ottoman legal system and islamic law which events sowed the seeds of hatred between arabs and turks both of whom are muslims the reasons for the decline and fall of the ottoman state the capitulations as one reason for terminating the ottoman state

partners of the empire offers a radical rethinking of the ottoman empire in the eighteenth and early nineteenth centuries over this unstable period the ottoman empire faced political crises institutional shakeups and popular insurrections it responded through various reform options and settlements new institutional configurations emerged constitutional texts were codified and annulled the empire became a political theater where different actors struggled collaborated and competed on conflicting agendas and opposing interests this book takes a holistic look at the era interested not simply in central reforms or in regional developments but in their interactions drawing on original archival sources ali yaycioglu uncovers the patterns of political action the making and unmaking of coalitions forms of building and losing power and expressions of public opinion countering common assumptions he shows that the ottoman transformation in the age of revolutions was not a linear transition from the old order to the new from decentralized state to centralized from eastern to western institutions or from pre modern to modern rather it was a condensed period of transformation that counted many crossing paths as well as dead ends all of which offered a rich repertoire of governing possibilities to be followed reinterpreted or ultimately forgotten

state and peasant in the ottoman empire studies the dynamics of ottoman peasant economy in the sixteenth century first it shows that contrary to the conventional wisdom about the stationariness of the asian agrarian economies ottoman peasant economy witnessed substantial growth in response to population increase urban commercial expansion and to increased taxation demands second the book argues that economic development did not take place independently of political structures of the state this meant that in the light of the fiscal and legitimization concerns of the ottoman state and contrary to the assumptions of the models of economic development changes in population and in commercial demand did not result in the disruption of the integrity of the small peasant holding as the primary unit of production the book develops these arguments in the context of a detailed empirical study of the economic trends of the state rules or institutions that

embodied the relations of revenue extraction and of exchange in ottoman anatolia

a major contribution to ottoman history now published in paperback in two volumes
